

IELTS Writing Task 2

Mixed Questions

You should spend about 40 minutes on this task.

Write about the following topic

Nowadays, more people are choosing to socialize online rather than face-to-face. Why is this happening? Is this a positive or negative development?

Give reasons for your answers and include any relevant examples from your own knowledge or experience.

Write at least 250 words.

An increasing number of people are meeting and interacting with friends and family via social media sites rather than in person. This essay will discuss the reason for this trend along with the writer's explanation as to why this is a positive phenomenon.

The main explanation for this trend, in my estimation, is the changes in our lifestyle brought about by the increased demands of the workplace. Research has shown that employees are working a lot more hours these days; however, keeping in touch with their loved ones has never been easier because of the advances in the development of technology. A case in point is my flat mate's experience. Because of her comparatively high workload, scheduling time for in-person socializing is very challenging. Rather than lose touch, however, she finds it convenient to use technology to maintain relationships.

In spite of the risks of becoming a victim of criminal practice, such as fraud, I believe that communicating online has been a positive enhancement to our daily lives primarily because of the convenience it affords to busy people. Before the development of the internet and social media, the length of time between contacting others could be considerable and, in some cases, could result in losing touch permanently. It is no longer necessary to invest time and effort in letter writing, for instance, that can be a burden for those who lead a hectic life.

In conclusion, people have increasingly resorted to interacting through technology because of their busy lifestyle. As a result, this practice has revolutionized the way we socialize and, in my view, has had a positive impact on society.
